

Daniel's experience of working across Europe and Asia helped him to develop a strong cultural sensitivity and appreciation for diversity. He is passionate about operations, lean leadership and enabling new capabilities.

At Amgen, he is leading a team to streamline operations through Industry 4.0 and Operational Excellence. He also leads Drug Substance Technical Transfers from US to Singapore. Prior to joining Amgen, Daniel worked at GSK Vaccines where he held multiple leadership roles within Operations, including an interim role as Drug Substance Manufacturing Head.

He holds a MS in Industrial Engineering and an International MBA.
