

Prior to joining Merck, David held roles as a Senior Scientist in biotech startups encompassing cell & gene therapy process development services, mAb discovery and preclinical development. He has an extensive track record providing contract research services as a Senior Research Scientist at AMRI Global, and as a product custodian for API GMP manufacturing at GSK. He holds a Ph.D in Synthetic Organic Chemistry from the Australian National University and a BTech(Hons) from Massey University (NZ) specializing in chemistry and process engineering.
