

Julie began her career more than 30 years ago at Merck & Co., Inc., USA as a scientist doing basic research on inflammatory diseases. As her interest in data generation and clinical studies grew, her career advanced to cover all aspects of developing lifesaving medicines and vaccines. At MSD Singapore, she drives the IT Hub's critical role in harnessing advanced technology, leading a wide range of capabilities such as Cybersecurity, AI and Analytics, Design Thinking and Cloud Services.

Julie also leads the Change Management function for the global Chief Technology Officer (CTO), executing programs that help 500 experts in the CTO organization globally to respond quickly to changes in the technology landscape. She is passionate about the power of technology and how it will shape a more diverse and inclusive workforce in the future.
