

Pierre possesses a scientific mindset, complemented by the practical approach acquired during his years as an engineer. This combination makes him a perfect fit for Design and Commissioning activities in a field that requires science and productivity. Pierre played a leading role in the Design and Qualification of several process equipment in GSK Bio (2001-2011).

He started his Consultancy company in 2007, since then, he has supported several Commissioning and Qualification projects in Singapore and China, focussing on a risk based approach and ASTM2500E guidance. Actively involved inISPE since 2012, he helps the association to share knowledge and best practices. Pierre has a Bachelor degree in Chemistry from the University of Liege and a Masters in Chemical Engineering from the Universite libre de bruxelles (Belgium).
