

Serhii is responsible for the development of the service business in South-East Asia: collaboration with key customers and service support for major projects and contracts.

After a research career in nuclear physics, he led Endress+Hauser's service organization in Japan for 9 years. Responsible, in particular, for expanding its calibration and metrological services, collaborating with major customers in the life sciences, food & beverage industries, he contributed to the development of the first edition of internal metrological standards for Endress+Hauser.

Based in Jakarta, Indonesia, Serhii graduated from Kyiv National University (Ukraine) and holds a Ph.D. in Theoretical Physics from Hokkaido University (Japan).
